USE PROTECTANTS FOR IMPROVING SOYBEANS

HUDSON, Iowa—The use of seed protectants for soybeans can play a very important role in improving soybean stands and yield if properly used, says Geo. M. Strayer, secretary of the American Soybean Association.

With the need for a big soybean crop this year as part of the defense effort, no farmer should overlook any step that may increase the yield, says Strayer.

A seed protectant can be profitably used to improve stands under the following conditions, according to Strayer:

When the seed will germinate 85% or less, when using machine-threshed seed of thin or cracked coats, when bothered with purple stain, or when unfavorable weather conditions make damping off,

Rail oddities

A RAILROAD PRESIDENT WHO LIKES TO SING GRAND OPERA INDULGES HIS HOBBY BY JOINING THE CHORUS OF THE "MET" WHEN BUSINESS TAKES HIM TO NEW YORK.

AMERICA'S NO. 1 MASTER OF ANIMATION FILMS--WALT DISNEY--PURSUES RAILROAD MODEL-BUILDING AS A HOBBY--BUILT AND OPERATES HIS OWN 1/8 IN SCALE MODEL TRAIN WITH COMPIRED LOCOMOTIVE CAPABLE OF PULLING A LOAD OF 3,000 POUNDS.

REBUILDING ITS BRIDGE ACROSS THE OHIO RIVER, A RAILROAD (1) MOVED AN OLD SPAN OFF ITS PIERS IN 57 MINUTES; (2) MOVED A NEW 518-FOOT SPAN TO THE SAME PIERS IN 75 MINUTES; (3) HOOKED UP THE TRACKS AND RESUMED FULL MAIN LINE OPERATIONS ALL WITHIN 20 HOURS.

mildew, and other diseases a factor in getting a stand.

But there is a danger in using a seed protectant, Strayer warned. It may have a toxic effect on the seed inoculant if not properly used. There is no advantage to be gained in the use of a seed

protectant if its use knocks out inoculation.

But the two can be used if a seed protectant is applied that is tolerant to inoculation, and if you follow directions. When a seed protectant is used the inoculation should be applied within 30 minutes before planting. If less time than that passes between the time you apply the inoculant and the seed goes in the ground, so much the better.

The use of a seed protectant alone will not produce good stands and large yields, says Strayer. But it is one of the steps to be taken when needed, just as are the use of fertilizers, high-yielding varieties, inoculation, weed control, proper planting and good careful combining.

1910-1914 period as a comparative base, the present index of prices paid by the farmer is 276, which is the highest point ever reached. And, indications are, economists say, that prices may go even higher before the end of the year.

Farm labor, for example, is one of the highest-priced items on the list, the index for which is 450. On the other hand, the index for fertilizer is only 144.

Another way of making the comparison is: A ton of fertilizer costing \$20 during the base period would now sell for \$28.20. But \$20 worth of farm labor in the base period would now cost \$90. Feeder calves which in the 1910-14 period would have cost \$20 would cost \$101 now.

High applications of fertilizer, made on a sound basis, therefore, are more profitable now than in any previous year. Crop acreages, especially harvested crops, may be reduced this year on many farms because of labor shortages; but heavier fertilization will help to maintain total production and improve the efficiency of the whole farm operation.

Self-Employed Should Not Report SS

If you work for yourself and are planning to include your name on the quarterly Social Security tax return you will file for your employees in April, don't. So says Joe P. Tipton, Manager of the Dyersburg Social Security Office.

Mr. Tipton says that many businessmen who come under Social Security as self-employed are under the impression that they should report their net income quarterly in the same manner that their employees are reported. This assumption is incorrect. A self-employed individual comes under Social Security only if the net income from his business is \$400 or more per year.

In most cases it is not possible to determine the amount of net income from a business until the end of the year, since profits in earlier months may be offset by losses occurring later. For that reason, the self-employed are required to report only once each year. This report will be made at the same time the annual income tax return is filed. A form for this purpose will be furnished by the Collector of Internal Revenue along with the income tax forms.

Although the self-employed will not report their earnings for 1951 until January 1952, Mr. Tipton stated that they will receive credit on their Social Security account just the same as if they had reported each quarter.

INCREASE YIELDS
Tennessee farmers can go far toward producing their part of a 16-million bale cotton crop this year by increasing yields rather than acreage. Some helps in this respect are: Good seedbed preparation on adapted land; use of sufficient fertilizer; control of insects; good cultural practices.

Sunday School Lesson

Valter C. Davis, D. D., Tennessee School of Religion University of Tennessee

Genesis 3:1-5; 6:5-9

BEGINNINGS OF SIN

ur series on "Great Epochs" "Creation," the beginnings world. Today we study "The ings of Sin," fully as baffl- d demanding as the study itself. Whence came sin? it here? Who is its author? s in His teaching never

dealt with this mystery. He re- cognized its presence and power and dealt with it, but He never explained where it came from. Paul did, and there is scarcely a more interesting chapter in all the Bible than Roman 1, setting forth the corruption of the human heart. Some people have denied the reality of sin. They say it is just a hang-over from a weak past, and that in the evolutionary process we will outgrow it. They of course say sin is not sinful, it is only a weakness. Kindred to this is the idea that education can cure sin. It is only an ignorance. Horace Mann and other great educators say that education can cure all the world's ills. The Bible teaches otherwise. It declares the sinfulness of sin. It

is not a mistake. It is not a weak- ness. It arises from a corrupt heart and drives man even against his better judgement to do wrong. "When I would do good, evil is present with me." Some people take the tempta- tion of Eve as very literal. Others look upon it as allegory, a poetic explanation of the evil presence. It's about as good an explanation of its presence as could be given. No man can be dogmatic about sin's origin. We say it did not begin with God. Then the counter question can be put. Then why is it in God's world? It is here, and it must be dealt with. It is in all men. Bible teaching on it may be summed up as fol- lows: (1) All men are born with- out fear of God. (2) All are born without trust and love for God. (3) They are born with concupis- cence—that is— from their birth they are full of evil desire and evil propensity. (4) This disea- se is truly sin. (5) Its natural con- sequence is eternal death. (6) To be saved "Ye must be born again." Human experience confirms its reality. As men grow older they become more conservative on the subject of sin. Harry Emerson Fosdick in his earlier ministry denied its reality. Later in life he preached a sermon on "Beyond Modernism" and set forth the fa- lacy of those modernists who deny sin and say that human progress is inevitable. In it he says we can- not go "head first" in solving the enigma of sin. Intellectual adjust- ments are not enough. "A man is vastly greater than his logic." We must give up the mood of Swinburne who says, "Glory to man in the highest, for man is the master of things." That is absurd. Man may master many things but man has not yet learned to master himself. Sometimes we are shock- ed into reality by the outburst of sin among us. The expose made in crime and gambling and corrup- tion all prove that man's greatest enemy is the force which we call "sin." It is a good world, when we look

Asparagus on Toast Luncheon

One of the delights of springtime is fresh green asparagus served on crisp toast and garnished with a creamy cheese sauce.

When asparagus arrives on your market in plenty, be sure to plan an asparagus-on-toast luncheon.

Even though the asparagus costs more than you ordinarily pay for a vegetable serving, only thrifty enriched toast and a cheese sauce will be needed to complete the main dish. Toast serves as both the base for the asparagus and the bread at the meal, and costs, on an average, less than a penny a slice.

The nutritional score of this luncheon rates high. It includes three B-vitamins and food iron in the enriched toast, vitamins A and C in the green asparagus, calcium in the milk. Besides all this, it tastes appetizingly fresh and good.

If you have hard-cooked eggs on hand, slice and use as garnish, adding extra protein to the meal. An easy way to prepare the asparagus is to cook the bundle of stalks in boiling salted water in a tall kettle, allowing the tender tips to cook by steaming.

ASPARAGUS ON TOAST

4 slices enriched bread 1 pound asparagus, cooked
Creamy Cheese Sauce

Trim crusts from bread and cut each slice diagonally. Toast until golden brown. Place hot aspara-

Creamy Cheese Sauce

2 tablespoons butter or margarine
2 tablespoons flour
1 cup milk

Melt butter and stir in flour. Gradually add milk, stirring constantly. Boil sauce until it thick- ens. Cook 3 minutes. Add season-

ings. Add cheese and stir over low heat until cheese is melted. Makes 1 1/2 cups sauce. Makes 4 servings.

at it in one way. God said that it is good. But it is also a very evil world. "There is not one that doeth good; no, not one." Christ

alone was without sin, and our only remedy is the new birth in Him.

SAVE WOOLENS WORTH A DARN

Prompt and skillful darning of a hole or tear can give a wool garment a new lease on life, say clothing specialists of the U-T Agricultural Extension Service.

For a darn that will not show, here are some suggestions: If possible, use ravelings from a left-over scrap of the fabric or from seam or hem. Lengthwise yarns are best for lengthwise darning; crosswise yarns for crosswise darnings. Sink the needle into the yarn of the fabric, leaving cut ends on the wrong side.

Lacking yarn from the same fabric, darn with dull thread of about the same thickness and appearance but slightly darker. Use as fine a needle as possible and short thread to avoid stretching the hole by pulling back and forth.

Work under a good light and on the right side of the fabric so that you can see the effect as you work, suggest the specialists. Take tiny stitches. Keep the darn flat. Stitches too tight will pucker, too loose will puff. When finished, steam press on the wrong side, then brush up lightly on the right side to lift the nap.

U-T 4-H LEADER NAMED TO HEAD WORK IN SOUTH

George Foster, assistant Four-H Club specialist of the U-T Agricultural Extension Service, has been granted leave to serve as Four-H field agent for the Extension Service, U. S. Department of Agriculture. He succeeds Dr. E. H. Shinn, retired, who coordinated Four-H Club work in 13 Southern States.

In the nearly three years he has been on the Extension Service 4-H staff, Foster has become known to Club members and leaders, and others interested in 4-H work, in every county of the State. His specialized field has been leadership training, both junior and adult, although he assisted in all phases of Four-H work.

Foster returned to Extension Service work nearly three years ago after a year's study under a Four-H scholarship in Washington. Previously he served two years as assistant county agent in Washington county. He is a native of Carroll county, and a graduate of the University of Tennessee.

RIGHT-OF-WAY

Tennessee law requires the driver of a vehicle to come to a complete halt when there is a pedestrian in or entering a marked crosswalk. The Tennessee Safety Council urges all motorists and vehicle drivers to observe this law and recognize the pedestrian's right-of-way. The Council points out that if the motorist fails to observe this law and hits a pedestrian the driver will not only be liable for a violation of the law but will be subject to a damage suit by the pedestrian. Authorities interpret this law as NOT meaning that the motorist must wait a long time at the crosswalk after he stops but the law does require him to come to a complete halt when there is a pedestrian in the crosswalk.

COMPLET JOB IS '51 THEME FOR GARDENERS

The home garden this year, while more important than for the past few years, should be first of all a work-saving garden, with no frills that do not contribute notably to crop success or family nutrition, say specialists of the U-T Agricultural Extension Service.

For the first half of the year, beginning in early spring, a half dozen vegetables may be called essentials in any garden. These include greens of some kind, onions, cabbage, snap beans, tomatoes, lettuce. Where plenty of garden space is available, Irish potatoes and corn may be added.

Other vegetables good to have available are English peas, radishes, when both space and help are available, beets, turnips, butterbeans, carrots, etc. It is notable that the most important vegetables are easy to grow in Tennessee climate, and that a satisfactory diet can be built upon them as far as the

vegetable part of the menu is concerned.

When only few kinds of vegetables are grown, specialists point out, pest control is easier. And, pest control will be more important this year in proportion to food prices and the possibility of labor shortages.

A few vegetables well protected from disease and insects, and kept in good supply by replanting, will mark the 1951 home garden.

Call to Action

HAVE you ever wondered how it would feel to go the limit on power and comfort and quality in an automobile? Or how it would feel to be lord and master of a car that can take its place with the finest in the "fine-car field"? Then, sir, this is a call to action. The first action is yours—the simple action of getting in touch with a Buick dealer and planting yourself behind the wheel of a ROADMASTER. Then let this great-powered and dazzling performer take over. There's action in every one of the 152 horsepower in its Fireball engine—more action than most proud owners of this eager beauty will ever use. There's counter-action in its gentle and sure-gripping brakes, the finest that Buick has ever engineered. But there's also luxury—the luxury of double-depth Foamtex cushions and custom upholstery—and of ample roadweight

magnificently poised on coil springs which individually cushion every wheel. There's a spacious feeling of room, above and around you—room that is unsurpassed anywhere in the fine-car field. And to make every mile effortless and relaxed, there's the very exclusive advantage of Dynaflo Drive—not as an "extra," but as a standard ROADMASTER feature. So why not drop in and satisfy yourself, as our guest, that here indeed is a fine car that goes the limit—in everything but price! Check for yourself what others ask—and what others offer—and you'll discover ROADMASTER prices a call to action that a wise man can't ignore. Equipment, accessories, trim and models are subject to change without notice. Tune in HENRY J. TAYLOR, ABC Network, every Monday evening.

When better automobiles are built, Buick will build them

TELEPHONE LINES ARE HUMMING FOR DEFENSE This country's telephone service is one of its greatest assets in time of emergency. It unites millions of people—helps thousands of businesses to get things done quicker—and is a vital part of our national defense. In the past five years Southern Bell has nearly doubled the number of telephones in service . . . nearly doubled Long Distance circuits, tripled rural telephones and made the service faster and better. All this growth—and maintaining the financial strength to keep on expanding—will be increasingly important to the South and the Nation in the days ahead. One reason this country can out-produce any other is because it has the most and best telephone service in the world. 75 YEARS OF SERVICE TO THE NATION SOUTHERN BELL TELEPHONE AND TELEGRAPH COMPANY

Tennessee Outdoors

Louis S. Clapper
State Game and Fish Commission
Farm Boys who are members of

4-H and Future Farmer organizations are beginning work in several sections of Tennessee on wildlife restoration projects under the joint sponsorship of the State Game and Fish Commission and the U-T Extension Service.

Boys are being furnished with a project record book in order to keep accounts of work done with upland game. The record book covers three major sections: restoration, management and appreciation of the upland game. Purpose of the project is to control hunting so as to permit harvest of only the surplus. Emphasis is placed upon restoration of food and cover habitat. In some cases, artificial raising of quail may be encouraged to provide a seed stock.

Instruction will take the form of sketches of proper land use, with emphasis on using idle areas for vegetation of value to the wildlife; control of free-running cats and dogs and protection of den trees; estimates of wildlife populations; and posting of farms with "Hunting By Permission Only"

Spring Apple Salads are Appetizing

Fragrant, spicy red Delicious apples team with green peppers for color and delicious flavor contrast.

A refreshing salad that sings of spring and looks like a decorative water lily is made of glossy green peppers and crisp, flavorful red Delicious apples. Cut the peppers petal fashion and remove seeds. Dice unpeeled apples, combine with grapefruit segments, toss lightly with mayonnaise and heap into pepper cups. Or, try this recipe for apples with red or white cabbage, topped with a sweet and sour dressing for extra special good eating.

The secret of success with these recipes is to select tender, flavorful apples and, thanks to an abundant harvest, prices are reasonable on choice quality fruit. When you're shopping, look for the juicy red Washington State Delicious apples which are especially choice for salads. Another good buy in local markets is the red Winesap all-purpose apple, which has a distinctive spicy flavor that's perfect for pies, cakes and puddings as well as for eating as is. The regular Winesap is preferred for cooked dishes and the smaller, economy "schoolboy" sizes are ideal for lunchboxes and after school munching.

SWEET AND SOUR APPLE-CABBAGE SALAD

- 1 to 4 red Delicious apples
- 1/2 cup seedless raisins
- 1/2 cup shredded cabbage
- 1/2 cup evaporated milk
- 1 tsp. sugar
- 1/2 tsp. salt
- Pepper
- 3 tbsps. vinegar

Dice unpeeled apples. Soak raisins in hot water for a few minutes. Rinse in cold water and drain. Add to diced apples and shredded

cabbage. Combine milk, sugar, vinegar, salt and pepper and mix well. Pour over salad. Serves 6.

signs. Essays are being written. Explanatory material is being distributed.

Many people wonder what happens to the fish when the annual high waters of Spring hit the streams. While exploratory work is most difficult at these times, biologists know that many nests of eggs are destroyed along with much small fry. Adult game fish have a tendency to hide behind protective boulders or trees or to move where backwaters are calm. Many "rough fish," especially catfish and carp, move out into the flooded fields to feed on the fringes of the water.

The U. S. Fish and Wildlife Service reports that the nationwide mid-January fowl inventory showed an increase which offset the 20% decrease noted in 1950. However, the population increase does not necessarily mean a good hatch of young in the Spring and Summer. And, next Winter's hunting regulations are determined by the year's production of young.

Stream fishing has one advantage over the lake variety—anglers frequently become attached to particular fish. Quite often a gigantic patriarch fish grows so cunning that he is even rarely hooked. Then, the fishermen who try the hole where "Old Joe" or "Carmichael the Cunning Catfish" resides year after year. A Manchesterite, for example, has a running feud with a giant rainbow, estimated to weigh ten or twelve pounds. He has hooked "the old cuss" eight times in a decade, always in one of two holes in Crumpton's Creek. He tied into the lunker trout late in March this year, using a Tellico Nymph. But the leader broke under the furious pressure with a sound like a snapping piano string. The angler was left with the line wrapped around his neck. However, he'll soon return to renew acquaintances with his old friend!

USE OF NITROGEN WILL HELP OFFSET GARDEN DELAY

Growth of plants in home gardens which have been delayed by wet and cold weather can be speeded by additional nitrogen fertilizer used as a sidedressing, say specialists of the U-T Agricultural Extension Service.

As long as soil remains cold the plant food in animal manure does not become available rapidly enough for greatest growth, specialists point out.

Nitrate of soda and sulphate of ammonia are useful for this special use in April. These are salt-like chemicals that can be used dry or dissolved in water. For use dry on cabbage, greens or lettuce in April and May apply either one along the rows at the rate of one level tablespoon to the yard of row, or one pound for 100 feet of row. If April or May are cold and wet, use a tablespoon for each newly set tomato plant, not close to the roots but sprinkled on the surface not nearer than 3 inches.

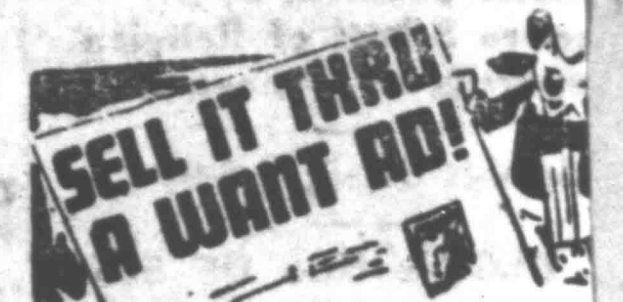

Either fertilizer can be dissolved in water, a level tablespoon to the gallon. This is most useful in dry weather, since the dry material will reach the plant roots well enough in showery seasons.

NEW HOME FRUIT SPRAY SCHEDULE AVAILABLE

A new spray program for control of pests on fruit trees in small orchards is now available from offices of county agricultural agents. The short schedule, as compared with the spray program suited to commercial fruit production, is given in Extension Leaflet 73,

"Home Fruit Spray Schedule." Home fruit growers, it is pointed out, usually wish to use combination sprays even at greater cost per tree in order to save time and work. The new home fruit spray schedule for the first time recommends the same spray materials for all the common fruits; and suggests that these materials may be used with reasonable success on all the fruits on the same day.

Since some of the recommended materials may not have been used by all dealers, home orcharders are advised to check with dealers to make sure spray materials be available when needed.

Local Happenings

Mrs. Mabel Peery, Mrs. Joe Sumrow and Mrs. Wymond Hurt left Tuesday to spend several days in Shreveport and Hayneville, La., as the guests of Mrs. Farrin Hilliard, Mrs. King Andrews and Mrs. George Breed.

Mr. and Mrs. Harry Jones Wilson and daughter, Dawn, of Memphis spent Sunday with Mrs. A. N. Jones, Miss Reba Jones and Mr. and Mrs. Harry Wilson.

Mr. and Mrs. Odell Hilliard and son, Wayne, and Mrs. Vera Hilliard were in Memphis Tuesday where they attended the Fashion Show at Hotel Peabody.

Mrs. J. A. Hart returned home Wednesday after spending several days in Memphis at the bedside of her sister, Mrs. W. H. Haste. Mrs. Haste is much improved after having been quite ill.

Fred Warren of Blytheville, Ark., visited relatives here Sunday.

Mrs. Jim White and Mr. and Mrs. Will Higdon attended funeral services for Mrs. Ann Hill at Friendship last Thursday.

Mr. and Mrs. Douglas Murchison and daughter, Ann, of Obion visited Mrs. J. H. Murchison on Sunday afternoon.

H. A. Townsend spent Sunday in Memphis with Mrs. Townsend who is greatly improved.

Mr. and Mrs. James Meeks and baby of Antioch visited their grandmother, Mrs. Jett Meadows, Sunday.

Just received a new shipment of cotton and crepe dresses prices \$2.98 to \$14.95. See them before you buy at Mrs. Vera Hilliard's Style Shop.

Mr. and Mrs. Wilburn Hass and children of Memphis, Mr. and Mrs. James Haynes of Ripley, Mr. and Mrs. Jerry Smith of Memphis visited Sunday with Mr. and Mrs. Bob Jones. Mrs. Smith remained for a longer visit.

Mrs. Cecil Sumrow spent Tuesday afternoon with Mrs. A. B. Steelmen who is a patient at the Lauderdale County Hospital at Ripley.

Mr. and Mrs. Neill Ferguson were in Memphis Monday to attend funeral services for E. R. Ferguson.

Mr. and Mrs. Bernard Higdon and children visited friends at Humboldt Sunday.

Mrs. W. J. Hass of Fayette, daughter, Mrs. Bob Jones, and Miss, spent a few days with her Mr. Jones, and left Wednesday for Chicago to visit her father and other relatives.

Mrs. James W. Jacques underwent a major operation at the Methodist Hospital in Memphis on Monday.

Mr. and Mrs. Jack McKnight of Union City visited Mrs. T. H. Simmons Friday afternoon.

Mr. and Mrs. Millo Hurt spent Sunday in Brazil with relatives. Mr. and Mrs. Rozelle Turner of Curve visited Mrs. T. H. Simmons Sunday.

Mrs. C. Wilson was carried to the Baptist Hospital in Memphis Wednesday. She will be placed under treatment there.

Mr. and Mrs. Marvin Jennings and daughter of Memphis spent Sunday with his parents, Mr. and Mrs. J. L. Jennings.

Mr. and Mrs. Louis Jackson attended the African Violet Show at the Memphis Museum Sunday.

Mr. and Mrs. Oscar Hilliard and Mrs. Odell Hilliard and son, Wayne, visited in Maury City Sunday.

Mr. and Mrs. Sewell Hawkins visited in Friendship Sunday.

Mr. and Mrs. Milton Perry of Friendship visited in the home of Mr. and Mrs. Sewell Hawkins last week.

PANSY PLANTS—Blooming size giant Pansy plants, 40c dozen, \$3.00 per hundred. Jackie Shannon, Phone 2051.

Mr. and Mrs. LaVon Osborn and children spent Saturday in Frayser with Mr. and Mrs. B. F. Martin.

MRS. HARGETT HONORED WITH BIRTHDAY DINNER

Mrs. A. G. Hargett was honored with a three-course birthday luncheon given by the Birthday Club of which she is a member at the home of Mrs. J. H. Murchison last Friday.

The rooms were decorated for occasion with spring flowers, the table centerpiece being a crystal bowl filled with jonquils.

The club presented Mrs. Hargett with a gift. Others attending were Mrs. L. L. McDearman, Mrs. D. C. Warren and Mrs. Fred Hart.

DE CLASS PLANS FOR EMPLOYER BANQUET

The Distributive Education Class of Halls High School is having their Employer - Employee Banquet Tuesday night of next week at English Dining Room at Reelfoot Lake.

CARD OF THANKS

We want to thank our many friends for the nice things they have sent and brought our daughter since she has been sick. We so want to thank Bro. Cooper for the kindness he has shown us. Mr. and Mrs. J. L. Jennings

"Let a Want Ad Be Your Salesman — Inexpensive, But a G-Getter."

HARRY WRIGHT HAS BIRTHDAY PARTY

Harry Wright, Jr. was host to a number of his friends at a party at his home Monday night, the occasion being his birthday.

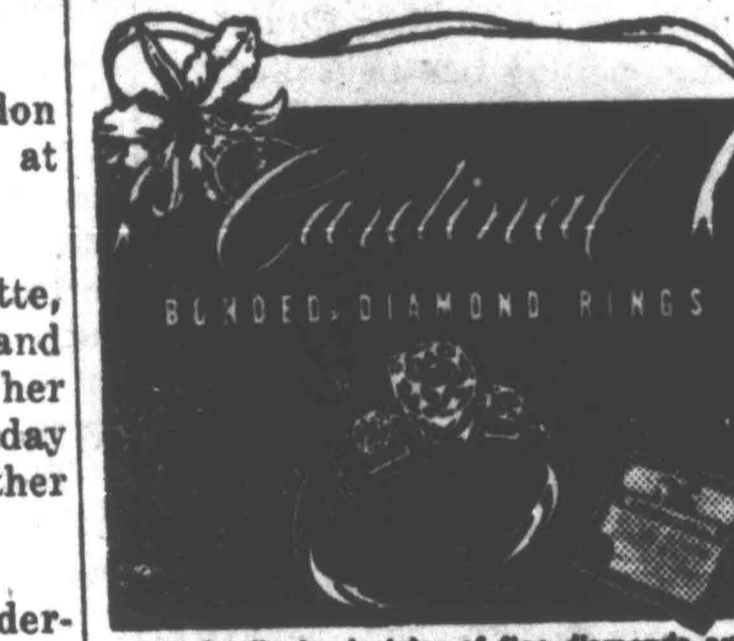

Upon arrival each guest received a balloon and double bubble. Games were played with Evalyn Smith winning the prize.

Happy Birthday was sung as all gathered around the dining room table. Cake and ice cream were served to sixteen guests.

Those present were: Evalyn Smith, Jane Chesier, Carolyn McCorkle, Perilyn Williams, Jo Ann Hurt, Letricia Vaden, Betty Dew, Herby Goforth, Paul Woodley, Jerry Smith, Inky Perry, Buddy Murchison, Sonny Higdon, Josh Nunn and Mr. and Mrs. Frank Baldrige.

New Social Security Tax Forms Mailed

Lipe Henslee, Collector of Internal Revenue for the District of Tennessee, today announced the release of the new household employers social security tax form. This return is to be used by the employer in reporting wages paid household employees during the months of January, February and March. If a person has a household employee on some part of 24 or more different days during the three month period and pays the employee \$50.00 or more in cash wages a return must be filed. In

things from China. This made our study of China more interesting. Thanks, Mrs. Reed.
The reporters this week are David Hurt and Robert Meeks.
5th Grade —
Mrs. Murchison's room wants to thank the room mothers for the nice Easter Egg Hunt which they gave the room at Mrs. Nunn's home. Isaac Reynolds found the lucky egg and received the prize. Birthday wishes to Jane Cheshier and Harry Wright who have had birthdays recently. Jane's mother sent a beautiful three-tiered cake for the room to enjoy Friday afternoon. Bubble gum was served also. Isaac Reynolds was the lucky one to receive the piece of cake with the hidden prize.
Our April calendar was drawn by Josh Nunn and Jerry Smith. Mrs. Daws' room is observing this week as "Bird Week." Inter-

esting information is being found and many good bird stories are being read. A new frieze is being drawn which shows several different kinds of birds.
The boys are planning to make several bird houses and also a bird feeder to place outside the window and we are also learning a bird call.
The boys organized a science club and will present a room program this week. The girls have organized a conservation club and gave a most interesting program on water and soil.
Sylvia Burns was in charge of the drawing of the April calendar. It is one of the prettiest we have had. It is three white ducks enjoying an April shower.
6th Grade —
Happy birthday, Herby Goforth. All the sixth graders reported a good time at Herby's party. Jimmy Nichols had a party Saturday afternoon.
Twenty-seven of the sixth grade class went to Sunday School Sunday.
We have been studying about the known lands of the Middle Ages. We drew pictures of the Taj Mahal in Agra, India in connection with our study of India. We also drew the Great Kahn's palace in Peiping, China.
7th Grade —
Congratulations, David Hallman, for winning the spelling bee at Halls and representing Halls in the National Spelling Bee at Ripley!
We were glad to have Carolyn McCorkle and Lou Eva Baker attend the spelling bee in Ripley.
We enjoyed the party that was celebrated by the seventh grade in the honor of Mrs. McCorkle on her birthday. The seventh grade president, Bobby Perry, presented her with a nice gift as a token of thanks and appreciation for the nice things she has done for the seventh grade this school year.
8th Grade —
Hi, folks! How is everyone on this "supposed to be" beautiful spring day?
We are just finishing our monthly tests and we think that they get harder every month.
The eighth grade hopes that Mrs. McCorkle enjoyed the party that was given for her last week. Mr. Cates is getting "hard" on us all of a sudden. We wonder if he wants to keep some of his basketball players here so next year he can have a best all round team!
Well, we'll be seeing you!

Safety
more than one-fourth were struck when they attempted to cross a street between intersections. In altogether too many cases, the child had never been taught the danger of these actions.
"One of the hardest facts that parents have to face is the realization that sooner or later their children will become independent and venture into traffic alone. But it's a fact that cannot be ignored, and that the better prepared a child is to meet that situation, the easier it will be for the youngster and his parents. Learning how to walk and play safely has to be a part of a child's normal growing up process."
The Tennessee Safety Council President urged parents to impress the following rules on their children:
1. Remember always that streets are for cars—and not scooters, tricycles, roller skates or play.
2. Cross the street at the corner only, and wherever possible at a corner with a traffic light signal or traffic officer on duty. Look both ways, then for turning traffic, and cross only when the way is clear.
3. Never forget that bicycles are subject to the same rules and regulations that govern automobiles. This includes careful observance of signs and signals. "Placing the blame for the annual toll of children killed in accidents on the shoulders of the motorist, the unpredictability of children and Fate is an ostrich-face method of not wanting to face the problem," Mr. Miller said. "Parents may be legally absolved from blame, but the moral responsibility for the safe future of their children is ever with them.
The Tennessee Safety Council's traffic safety education activities each month are in cooperation with the National Safety Council. "Child Pedestrian and Bicycle Safety is the theme for April."

in history. Several lots of wool in Tennessee have sold recently for \$1.25 to \$1.50 per pound.
A sheep shearing school will be held at the West Tennessee Experiment Station on Monday and Tuesday April 16 and 17, for 4-H Club boys.
INOCULATION, A 'MUST' FOR PEAK YIELDS
HUDSON, Iowa—Inoculation of soybean seed is a must if farmers are to be sure of peak soybean yields this year to meet the government's production goals, advises Geo. M. Strayer, secretary of the American Soybean Association.
Many farmers believe that once a field has been inoculated with the proper bacteria, there is no longer any need to inoculate each time soybeans are planted, Strayer says. Although the bacteria that form nodules and fix nitrogen on the roots of soybean plants can live over in the soil from one year to another, they fail to do so many times. This happened in Iowa last year, when many fields of soybeans in north Iowa failed to form nodules on their roots.
When a soybean crop doesn't set nodules, it may mean a loss in yield as high as 20 bushels per acre, Strayer says. Since uninoculated soybeans do not supply their own nitrogen, it may mean that more of the soil's nitrogen will be drawn out than can be replaced by \$20 worth of commercial fertilizer per acre.
Even on land where the bacteria have successfully wintered over, freshly inoculated fields out-yield uninoculated fields. Inoculat-

ed soybeans outyielded uninoculated soybeans by two bushels per acre in Indiana official test plots in 1950, according to Strayer. He believes that this increased yield is brought about because inoculating the seed places live, active bacteria where they can go to work at once instead of having to wait until the roots grow out to the bacteria.
Inoculation is a positive factor in the production of soybeans. It should be as much a part of every good farmer's practices as the use of high yielding varieties, weed control, proper planting and good

careful combining, Strayer concludes.
UNDUE ADVANTAGE
Pedestrians are urged not to take undue advantage of the law which gives them the right-of-way in a crosswalk. Don't stroll leisurely after the driver has come to a halt. The Tennessee Safety Council urges pedestrians to clear the crosswalk as quickly as possible and thereby create better respect for the law which requires vehicle drivers to halt at the crosswalk.

(Continued from Page 1)
our feathered friends. Twelve bird houses were built last week. Mexico is our social studies sub-

ject this week and we are acquainting ourselves with Mexican customs and dress. Thelma Burroughs, one of our pupils, who recently visited Mexico told us many interesting things about the Mexicans and also told us about eating some

of the famous tortillas of that country. Thank you, Mr. Bill McGarrity, for that big jar of paste. We are really going to enjoy it. Don't be surprised if you hear that we are all "stuck up!"

Mrs. Murchison's room is "knee-deep" in book reports. We have enjoyed working on our reports and much work has been put on making the covers for our reports. Our Health Club is doing some interesting work under the leadership of our president, Josh Nunn. We were glad to have Harry Wright play at the P-T. A. Meeting Monday afternoon.

Sixth Grade - Twenty-four of us went to Sunday School Sunday. We have been making some bowls from news papers. We are enjoying our health study. Now we are studying all the kinds of muscles in our body. This is our spelling contest week. We will name the winners next week.

We enjoyed Brother Stone's talk last week. We wish to thank Mr. Chronister for framing our picture. We think it is so pretty. Thank you, Mr. Chronister.

Seventh Grade - Boy! Are we some busy bees? What for? Oh, well, you see it's just one more week till the seventh and eighth grade party—it does take a lot of planning! But it'll be worth it—at least we think so. Have you heard of the new invention? What? Well, one of our pupils invented a new way to spell "cucumber." Would you like to know how to spell it the new way, too? Well, it's sorta odd, but here it is "Q-U-U-E-R-K-U-M." Like it?

ANHYDROUS AMMONIA
We will have it and apply it for you. Don't pay higher prices for nitrate. Anhydrous ammonia costs 8 1/2c per lb., others 13c to 23c.

We are mighty proud of our soft ball team. We wish to thank Bro. Cooper and Bro. Stone for inviting us over to their church for a whole fifteen minutes of singing led by the pupils of Halls Elementary School. Thanks! We enjoyed having them with us two mornings of last week.

We enjoyed having Brother Cooper and Brother Stone visit us last week. We sang many songs that they liked. Everyone is getting ready for the Medal Competitive examinations!

We are sorry to say that no one had a birthday in the eighth grade this week. We want to thank the seventh grade for inviting us to the 'prom' and we gladly accept the invitation. We are really looking forward to a wonderful time. "Au revoir."

F. H. Paschal
(Continued From Page 1)
it absolutely necessary that all new machines be included on a new application blank. Otherwise, the gas used in these machines that are not listed with the Department of Finance and Taxation will not be eligible for refunds.

These changes in the Law were recommended by the Tennessee Farm Bureau to facilitate enforcement and guarantee the continuation of this type of Law which 37 other states have.

In order to get an application blank on which to list machines not previously owned by the Permit Holder, address a post card to the Department of Finance and Taxation, War Memorial Building, Nashville 3, Tenn., and ask for an application blank for farm gas.

Our discussion of calfshead vaccination and the dangers of Undulant Fever has caused several farmers to want to get their milk cows tested for Bang's. These tests must be made by a graduate veterinarian. One of the veterinarians in Dyersburg has agreed to make these tests at a very reasonable price per cow, if several cows in the same community are to be tested at the same time.

Fortunately, children under 14 are not very susceptible to Undulant Fever, but older people can quickly contract the disease by drinking the milk or even being around a cow which has Bang's disease.

DYER MAKES STATEMENT
(Continued From Page 1)
some money for the purpose of concreting these streets. Say if we could save in the next two years five or six thousand dollars then pick one of these unimproved streets and concrete as far as this money will go even if it is only a few blocks, then save up some more money and continue the project. Of course, this would be slow and every street could not be first, but if we do not start somewhere, sometime on a program the job will never be done.

I have made the decision to make this race myself and have not nor will not make any special promise

Here's where You come into your own

Once in a while, any man is entitled to let himself go.

He's entitled to that glow of pride that comes from feeling like the very important person that he really is.

He's entitled to take practical steps to make his dreams come true.

In short, he's entitled to own a ROADMASTER, and particularly a ROADMASTER as it is custom built for '51.

For this great automobile is more than big and roomy and distinguished in its styling.

It's more than sweetly willing in performance, and superbly poised in stride.

It does things to you, when you let yourself sink deep down in the subtle softness of its cushions, and run a caressing hand over the fine texture of its fabrics.

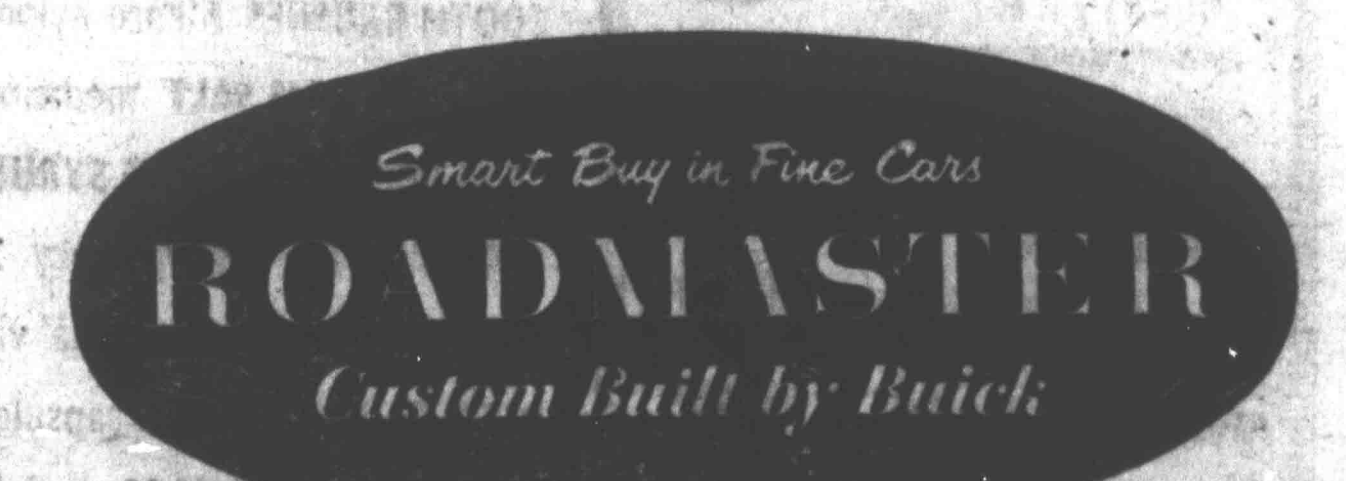

This is everything a fine car should be!

Of course, this brilliant performer is Fireball powered. It is cushioned by coil springs on every wheel. It provides, at no extra cost, the complete relaxation of Dynaflo Drive. It has durable and dependable sturdiness engineered into every mechanical part.

But the best is yet to be told. When you check the ROADMASTER price list, you'll find that the car of your choice can be yours for hundreds of dollars less than you'll pay for others with comparable reputation.

Come in soon and see this buy of buys in the fine-car field.

Equipment, accessories, trim and models are subject to change without notice.

Sunday School Lesson

By Walter C. Davis, D. D., Tennessee School of Religion, University of Tennessee

(Deuteronomy 6:20-25; 5:1-6)

"GOD IN A NATION'S LIFE"

The Lord was preparing His man from the start. Born a slave, raised in the king's palace, taught the laws and learning of the Egyptians, taught also the idealisms of the Hebrews by a proud slave-

mother. He was at the official center of the proudest civilization of ancient times, and he saw his own father toiling at the beam of the brick kiln.

He later knew the solitude of the desert life. He had time to think and gain wisdom. He saw the desert democracy of a nomadic people with its simple justice concerning man and beast. He learned to know all the mountains, the rare water supplies, and the deathtraps of the desert.

Moses looms on the pages of history among the very highest. A learned historian recently said that the three men who influenced history most were Moses, Paul and Luther. Measured in any way Moses was great. He had a sympathetic heart. He had a great sense of loyalty to his own. He threw himself into the breach between God and man: "If Thou wilt not forgive... then blot in out of the book which Thou hast written." His mind was capable of great mental sweeps, and he passed not by the minor details of law. He laid the foundations in law and government which have survived 30 centuries.

The lesson today studies the time of Moses. It was in the flower of Egyptian civilization, one of the world's greatest. The time of the pyramids. For Israel it was the time of slavery, of a spectacular gaining of freedom, of a whole nation without a country in wilderness wanderings.

The leading of this nation through the wilderness for 40 years to a promised land already settled was one of the most daring feats in all history. The rank daring of the thing required stupendous faith.

It is said the theme of Deuteronomy is fidelity. Fidelity to God and His law. The people were to read this law, talk about it, nail it on the doorpost of the home. "Thou shalt teach it to thy children diligently."

I made a test in a high school, and found that of about 300 scholars only 10 knew the Ten Commandments. This in our own state in what is called "the Bible belt." How can America expect anything else than juvenile delinquency when our children grow up without the ideals of right and wrong?

If Moses were speaking to America today he would say, "Hear, O America, the statutes and the judgements which I speak in your ears today, that you may learn them, and keep, and do them. The Lord has not made a covenant with our fathers only, but with us, who are alive this day." (Deut. 5:1-3)

Time is growing short for installing hay driers for this year's crop; help on technical matters involved in constructing driers may be obtained through county agents.

Tennessee Outdoors

Louis S. Clapper State Game and Fish Commission Fishing is now in the sport spotlight and thousands of anglers will attempt to harvest the surplus crop of finny fighters in the next few weeks.

Some folk may wonder at the use of the term "crop" in conjunction with fishing yet it is most appropriate. As far as productivity is concerned, a given body of water should be considered a "pasture" with the fish and other aquatic life the "livestock" living therein. Just as a pasture produces only so much hay or forage to support a certain number of cattle, a body of water supports only a certain number of fish. This is true both in impounded waters or running streams. And, just as in a pasture, the rate of fish productivity of water depends upon fertility.

Just as a crop on land should be harvested to prevent waste, the surplus fish should be taken. They will be if the water is fished. When a body of water is overpopulated in relation to food available, the fish are easily taken. Then, when the surplus is removed, the remaining fish have enough to eat and are difficult to catch—often so difficult that the fisherman's interest wanes and the pressure is relieved. Thus, waters are seldom fished out by hook and line methods. However, if the surplus are not removed all the fish may be stunted, and all the poundage the water "pasture" produces will be in the form of a multitude of fish too small to eat.

The annual up-surge of fishing interest is keeping law enforcement officers of the State Game and Fish Commission busy. Numerous violators have been nabbed in recent weeks on a wide variety of offenses. Two big cases, involving cafes on Tennessee-Kentucky Lake near Johnsonville found serving game fish illegally, head the recent list.

Ison Lake, located on the Federal Wildlife Refuge near Tiptonville, is now open to public fishing for the first time. Only a standard Tennessee hunting and fishing license will be required to fish on the lake. Boats and baits will be available.

Wildlife Oddities:—Ambitious beavers are competing with big Bagnell Dam on the Lake of the Ozarks in Missouri. The beavers built dams immediately below the spillway and caused flooding of roads around the structure. . . . Back in the 1877-1881 period several thousand European migratory quail were liberated in Maryland. They prospered until the migratory urge took over and none were seen again. . . . In Pennsylvania a hunter crippled a rabbit only to have a young red-tailed hawk attempt to take the prize. The hawk, however, couldn't free itself from the rabbit or fly away so it, too, was taken prisoner.

Employee Should Give SS Data

"Help your employer to help you" is a good slogan for everyone who is working on a job covered by Social Security. That's the word from Joe P. Tipton, Manager of the Dyersburg Social Security office. Your employer is required by law to report your wages every three months for crediting to your Social Security account. He is supposed to enter your correct name and Social Security account number on each report. If he fails to turn in the correct name and number, he receives letters from the Social Security Administration concerning his failure to do so. This additional correspondence is time consuming and expensive for your employer. He wants you to get proper credit on your Social Security Account so that you and your family will get all the benefits due you, but he cannot do it unless you help, Mr. Tipton pointed out. You should show your Social Security card to your employer immediately when you go on a new job so that he can be sure he has the correct information for reporting your wages. If you have lost your card or are going on your first job and have never had one, you should apply at the Dyersburg Social Security office. If you do not live in Dyersburg, you can get an application blank at any post office and mail it to the Social Security office. The same application blank can be used for getting a new card with your same account number if you have lost your card, or to apply for a number if you have never had one. "Help your employer to help you," Mr. Tipton says, "so that you and your family will get all the Social Security benefits for which you and your employer have paid."

CUTWORM CONTROL EASIER WITH DDT Use of DDT to control cutworms is a new recommendation of U-T Agricultural Extension Service specialists, which should be of interest to home gardeners. Older recommendations of Paris green bait and paper bands for the plant are still good, specialists point out; but Paris green is a deadly poison, and the banding method is limited to small plantings. The safer and more rapid plan is by use of DDT, preferably a 10% concentration. The dust is applied to the stems and on the ground close to the stems. As DDT works partly by contact with the feet of insects, the pests don't have to eat to be destroyed. This is important in cutworm control, since a few bites in a plant stem are enough to destroy the plant.

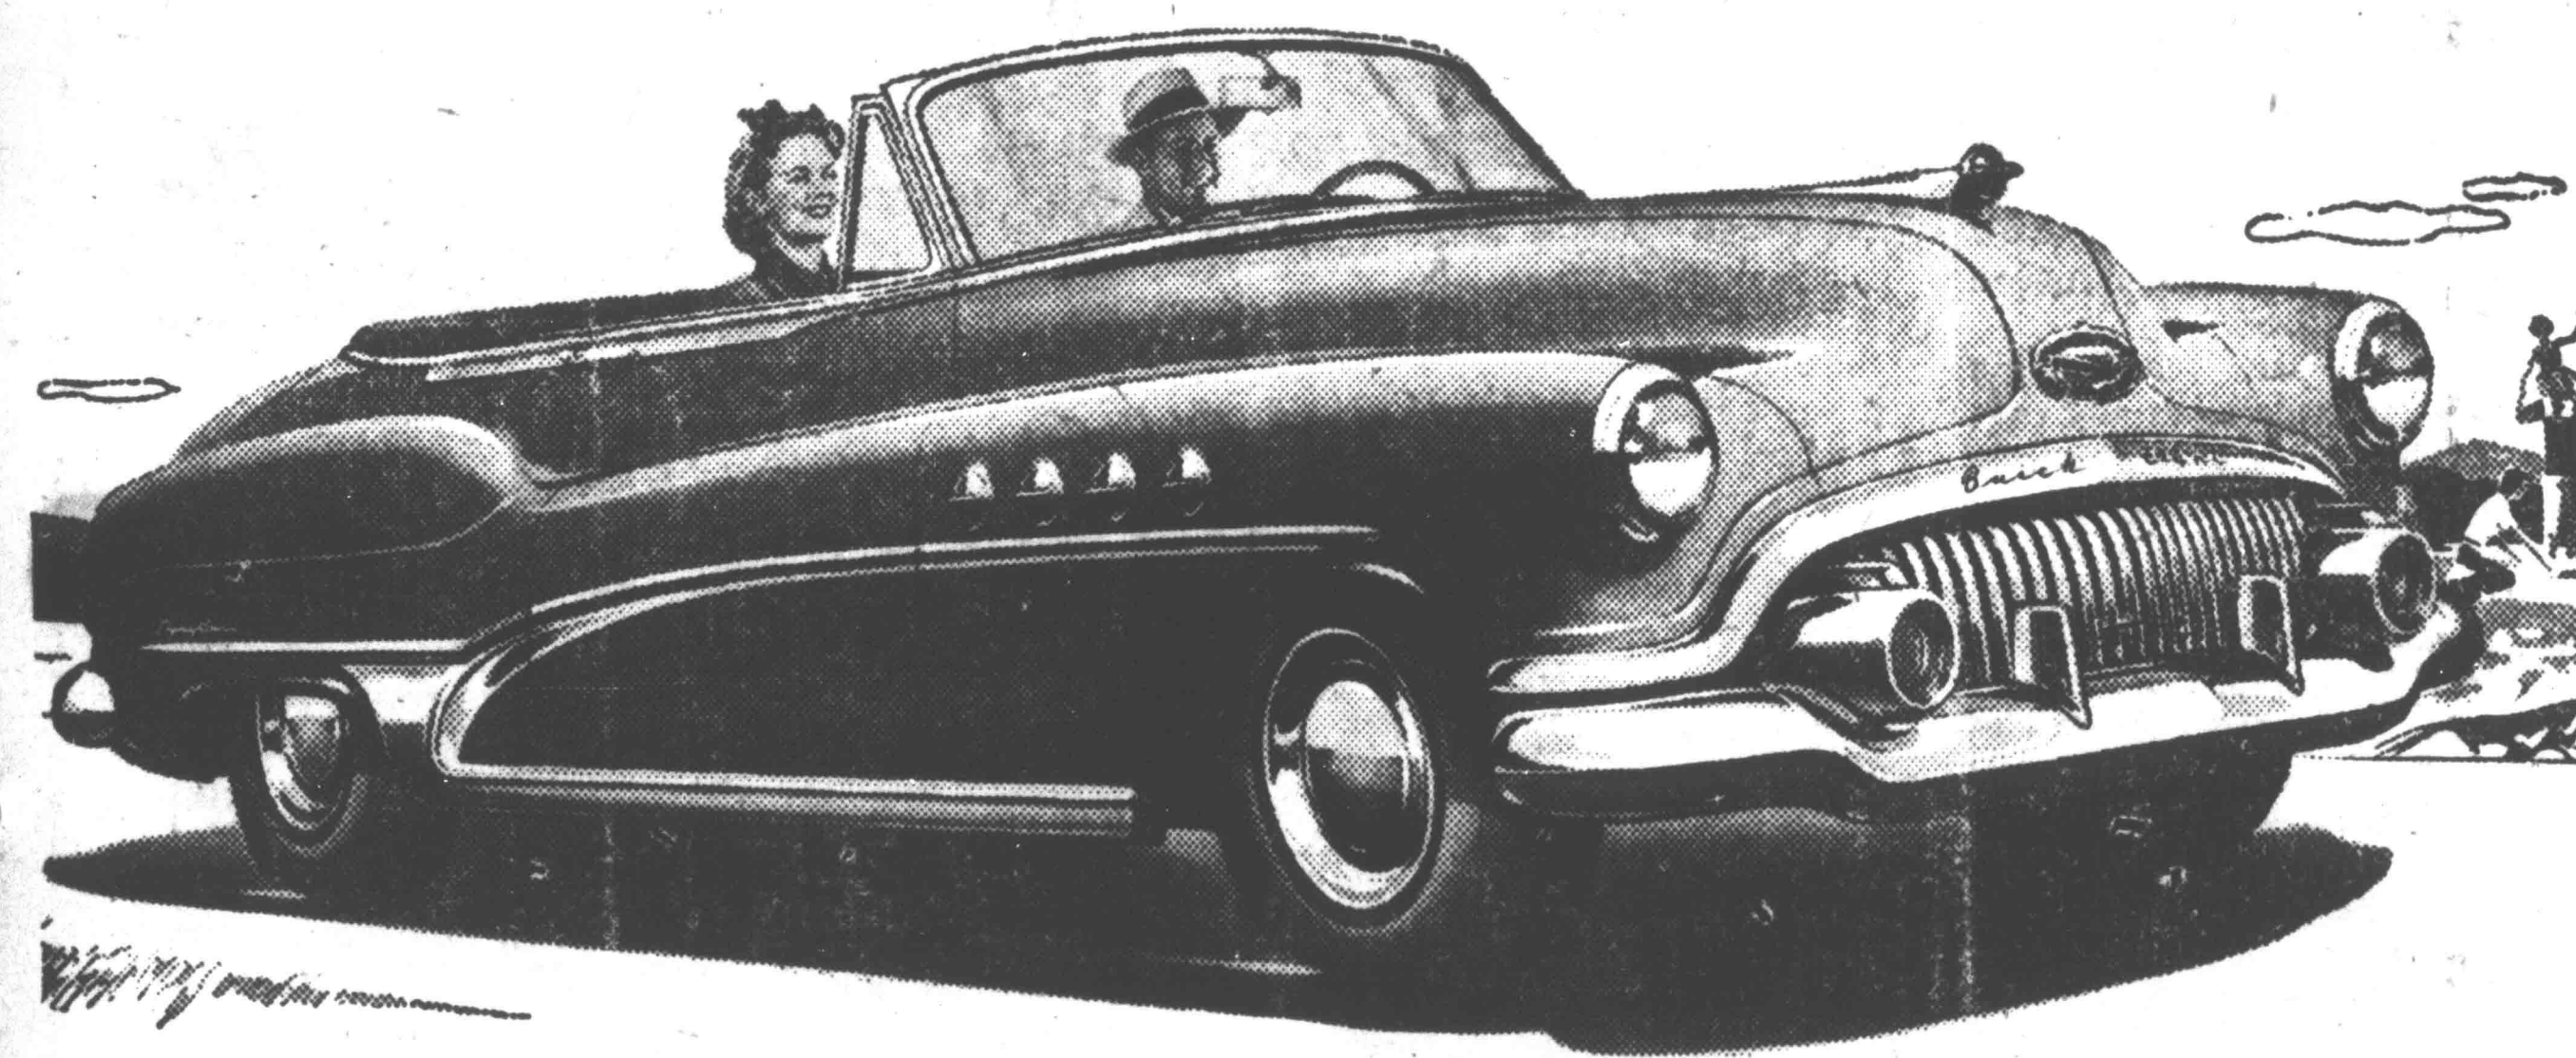

ANHYDROUS AMMONIA We will have it and apply it for you. Don't pay higher prices for nitrate. Anhydrous ammonia costs 8 1/2¢ per lb., others 13¢ to 23¢. — Cheaper and Better — FOR FURTHER INFORMATION SEE GAILON SMITH PHONE 5023 HALLS, TENN.

Why not give your Pride a break?

Let's see what it means to own a ROADMASTER. It means, first of all, that you're a shrewd judge of fine manufacture. Nowhere will you find a mechanism more skillfully fitted part to part with scrupulous precision—engineered to stricter standards of fine-car quality—than the deep-framed and durable ROADMASTER chassis. It means, also, that you possess keen appreciation of everything that makes for unsurpassed performance. For there's more to this dazzling beauty than its thrilling take-off. There's the surplus of power that you need to make you the master of busy traffic or open road—plus the velvet magic of Dynaflo Drive (at no extra cost, mind you). There's the level-going luxury of ample roadweight buoyantly balanced on coil springs on every wheel—and the security of brakes specifically engineered for firm control of this great-powered beauty.

Birthday of the Banana Split

To generations of teen-agers the banana split has been a symbol of quality—the finest thing of its kind. It is still part of growing up to treat your best girl or gorge yourself on the king of soda fountain dishes. We think it's time to celebrate the birthday of the banana split. And there's no better time than the Illinois Central's Centennial year. The Illinois Central brought the banana to Mid-America. The fruit was well-known in New Orleans in the 1860's, but people said it was too perishable to ship north. Illinois Central men disagreed, said it could be done, and in 1880 enterprising banana men shipped 22 carloads of bananas north via Illinois Central. Nowadays the Illinois Central hauls many thousands of carloads of bananas a year—fine business for the railroad, fine eating for the people of Mid-America, and a credit to the foresight of Illinois Central men. The Illinois Central begins its second century determined that this kind of vision shall continue to work for the people of Mid-America. For Mid-America's future is the future of the Illinois Central. W. A. JOHNSTON President

ILLINOIS CENTRAL RAILROAD

Local Happenings

Dennis Manuel, son of Mr. and Mrs. William Manuel, is reported as doing nicely following a tonsillectomy at St. Mary's Hospital in Humboldt.

Mrs. John Woodard has spent several days at the bedside of her father, Will Abernathy, in the Nankipoo community. Mrs. Sidney Gooch has taught for her in the Double Bridges school during her absence.

HARDWARE WEEK SALE — One week left of bargains. Hurry before supply is gone. Coles Hdw. Co.

Cecil Sumrow is reported as improved after having been ill for several days.

T-Sgt. and Mrs. Paul Simms and daughter have gone to Mill Creek, Pa. to visit his parents prior to returning to Mobile, Ala.

Mrs. Willie Vaughn of Carthage, Miss., is the guest of friends here.

Mr. and Mrs. Harry J. Hall of Millington spent Monday night and Tuesday here.

Mrs. Ike Falmore returned home Tuesday night after spending several days in Nashville with Mr. and Mrs. Fletcher Smith.

Mrs. H. L. Beech of Rutherford, Mrs. Norman Thornton of Dyer, Dr. Sara Murray of Gates, Mrs. A. N. Jones and Miss Reba Jones spent Wednesday in Memphis. Dr. Murray remained for a longer visit.

PAINT UP, CLEAN UP — We have what you need. Outside white paint as low as \$3.50 per gallon. Porch and Floor Paint, \$3.75 per gallon. Varnish and floor finishing materials of all kinds. Come See. Coles Hdw. Co.

T-Sgt. and Mrs. Paul Simms and daughter, Teresa, Mrs. Harry Hall and Miss Hope Hall were dinner guests of Mrs. Myrtle Chambers at Reelfoot Lake Sunday.

Mrs. Y. S. Brown has been ill for several days. Mrs. Joe Hurt has been working as city recorder during her illness.

Gordon Rogers, Mrs. Mattie Dew and Bobby and Jo Alice Phillips spent Sunday and Sunday in Blytheville, Ark.

Joe Chambers has been ill with flu for several days.

Mr. and Mrs. Carroll Avery and children of Decaturville visited relatives here and in Dyersburg Sunday.

Ham-Apple Casserole is Delicious, Thrifty

Red apple slices crown this savory casserole which may be made with leftover ham.

The juicy, flavorful combination of ham and crisp, spicy red apples baked in a casserole, is a grand idea for family dinners and makes a delicious meal in itself when served with a mixed green or jellyed salad. Both appetizing and nutritious, it's also thrifty now while local markets are featuring choice quality Winesap apples from Washington State at real economy prices.

These tangy red Winesaps are equally good for eating and for use in salads and cooked dishes. The smaller schoolboy sizes are just right to tuck into lunch boxes and, since this apple is a good keeper, you can buy in quantity and have them cold and crisp in your refrigerator.

SAVORY HAM-AND-APPLE CASSEROLE

3 cups cooked ham, ground	1 egg
3 red Winesap apples	1/2 cup milk
1/2 tsp. dry mustard	1 cup bread crumbs
1 tsp. onion, grated	1/2 cup brown sugar
2 tbsps. butter or margarine	

Combine ham, mustard, onion, egg, milk and bread crumbs and place in greased baking dish. Core apples and cut into 1/4 inch thick slices. Arrange slices to overlap on top of ham mixture. Sprinkle with brown sugar and dot with butter or margarine. Bake uncovered in moderate oven (375°) about 40 minutes or until apples are brown and tender. Serves 6.

Mr. A. B. Witt spent Monday in Jackson with Mrs. W. M. Shires. Mr. and Mrs. Raymond Butler of Dyersburg were guests of Mrs. Bess Jordan Sunday.

Warren Nunn, son of Mr. and Mrs. David Nunn, underwent an appendectomy at the Baptist Hospital in Memphis Tuesday afternoon.

CHICKEN FEEDERS AND FOUNTS — Most any kind and size. Coles Hdw. Co. adv.

Mr. and Mrs. Cliff Doza and family have moved to Ripley. Mr. Doza is employed by the Lauderdale County Enterprise.

Mr. and Mrs. M. H. Stallings and daughters, Lynn, and Ruth, visited friends in Mayfield and Loneok, Ky. Sunday.

Mr. and Mrs. James Paige, Mrs. Virginia Walpole and son, Jimmy, W. C. Paige and Helen Paige visited their mother, Mrs. Willie Paige, at St. Joseph Hospital in Memphis Sunday.

Miss Willie Vaughn of Carthage, Miss., Mrs. Wilma Agee of Dyersburg and Mrs. Will Smith were dinner guests of Mrs. Millo Hutr Tuesday.

RUBBER HOSE — 5 & 10 year guarantee. Come See. Coles Hdw. Co.

Dorothy Marchbanks visited her parents in Frayser during the weekend.

Mr. and Mrs. Sidney Gooch, Miss Ouida Gooch and Joe Gooch spent Saturday and Sunday in Selmer as guests of her father and mother, M. and Ms. Tull.

Mrs. Bess Jordan and son, Ernest, have returned home after spending three weeks in Memphis as the guests of relatives.

WALL PAPER — Lots of New Patterns. And, don't forget, you save one-fourth, too. We have Room Lots as low as \$2.45 complete with Border and Ceiling. Coles Hdw. Co. adv.

Carlton Wilkes of Memphis, James Wilkes of Dyersburg and Mr. and Mrs. Paul James and two children of Jackson spent Sunday with C. N. Wilkes.

Mrs. G. V. Daws of Blytheville, Ark., spent a few days here this week with her mother, Mrs. A. B. Witt.

Mr. and Mrs. Jimmie Jacques, Jr., of UT at Knoxville spent the weekend at home.

Countians Attend Top Crop Banquet

Several business men of Lauderdale County attended the "TOP CROP" banquet at the Peabody Hotel in Memphis Friday night.

More than 300 FFA boys from West Tennessee were there to receive the award so justly due them for the outstanding work they had done in various judging competitions.

Though Trimble and Tigrett won the cups for being the best judging teams in West Tennessee, we are proud to report that of the great quantity of pennants distributed for perfection, Ripley claimed 6 out of 9 for first place in the Covington District. Ripley and Halls also claimed 2nd and 3rd places in several of the judging contests.

Both the banquet and the entertainment was under the direction of the FFA boys and the FFA Sweethearts.

Mr. G. E. Freeman, representing State Vocational Education, with whom many in West Tennessee are unacquainted, gave a most interesting talk on "Rural Life, Yesterday and Today." Mr. Landrin, who is associated with TVA presented an interesting picture showing what farmers and TVA products can do for a tired, weather beaten farm.

"Top Crop," referring to the "boy himself," is by far the most vital factor in both the social and economical life of the country today. Every citizen should be interested in the functioning of such an organization, and urge full cooperation of all local organizations to participate in a program that is designed to prepare the farmer of tomorrow with the understanding for a better living and to sow the seed that will grow and develop into a real democracy.

The Lauderdale County Farm

Bureau is proud that it is one of the many organizations that help make "Top Croppers" organization a part of the farm boy's activities.

—Reporter

DEMONSTRATION FARMER CHECKS PASTURE VALUE

The question of how much pasture worth is being answered by the satisfaction of A. A. Deakins, demonstration farmer of the Sulphur Springs community in Washington county. Mr. Deakins found that one pasture on his farm gave a net return of 37.4 cents per cow per day, and another field gave a net of 38.7 cents per cow per day.

Take the older pasture for example. This 21-acre field was prepared and seeded in 1947, and fertilizers were added in 1949 and 1950, according to recommendations of the county agent. Total cost per acre until the first of this year was \$61.61. Net returns have averaged \$73.32 per acre for three years. The field provided some grazing the fall it was seeded; and until January 1 this year a total of 555 cows days' grazing were supported. It also provided some hay in 1949. Mr. Deakins figures that net profit on the field has been 37.4 cents per day per cow.

5th Grade — Our Health Club had an interesting program Friday. Taking part on the program were Isaac Reynolds, Harry Wright, Letrec, Vaden, Sonny Woodley and Rita Chipman. We were glad to have our teacher's sister, Mrs. W. E. Perry, from Nashville, Arkansas come and play the piano for us. We hope she will come again soon. Those of us who were out of town over the weekend were: Jane Cheshire, Hernando, Miss.; Sonny Woodley, Dyersburg; and Rita Chipman, Little Rock, Ark. Mrs. Daws' room has learned to sing two songs in rounds, "The Bird Call" and "Bells are Ringing."

Hats off to the boys for winning the spelling match Friday! Ray Garrison and Larry Cooper were the champion spellers. We are enjoying our new choral reading, "The Throstle" by Tennyson. The boys Science Club presented a good program on Reptiles Monday over HFG. Hope you were listening.

6th Grade — Happy Birthday, Loretta Meeks and Tommy Joe Stanley. "Miss" Olive's birthday was Sunday — we wish her many more. Twenty-two of us went to Sunday School Sunday. We were sorry to hear about the passing of Nancy Young's great-grandfather, Luther Leroy Craig. We enjoyed the inspirational talk given by Chaplain T. S. Cordill in the auditorium Thursday morning. We are wondering about the tricks that the weather man is playing on us. Our spelling contest closed Friday. The winners are Thomas Jacobs, Molly Watts, Nancy Young, Jean Davis, Herby Goforth and Larry Steelman.

7th Grade — We were glad to have Blanche Nunn, Gwila Ozment, Buna Smith, Carolyn McCorkle and Tommy McDearman sing and dance at the Beauty Revue. We are all looking forward to Rally Day Saturday. Congratulations to Carey Corlew, Sonny Higdon and David Hallman for having the best maps in history.

8th Grade — We enjoyed having Chaplain T. S. Cordill speak to us Thursday morning. Since visiting here five years ago he has been in Japan for three years and has traveled extensively. He is in the Air Force stationed at Barksdale Field, Shreveport, La. We are all looking forward to the "Prom"—it won't be long until that time will be here. From the looks of things we are going to be given a lovely banquet and party. We are also looking forward to the 4-H Club Rally Saturday. Several of us are planning to attend. We are proud of some of our eighth graders who will attend the Track Meet at Ripley Friday. We hope some of them win. Readers, won't you wish them luck a long with us? Be on the lookout for our Chicken Salad Supper before too long. We wish to express our sympathy to Mrs. Voss due to the death of her aunt. Happy Birthday to Marlene Hutcherson—we wish you many more! We were proud of Lucinda Alsobrook, Iona Brasher and Helen Cherry who sang and danced in the Junior Beauty Revue.

F. H. Paschal
(Continued From Page 1)
man should be ready to treat in any of the following ways: (1) place a stick crossways in the animal's mouth, securing both ends with twine behind the ears. Stand animal with head up hill to relieve pressure. (2) In mild cases drench with half pint of warm milk or 12 ounces of raw linseed oil. (3) In severe case puncture the animal on the left side about three inches below the loin and halfway between the last rib and the hip with a trocar or other suitable instrument. Recent experiments indicate that feeding hay every morning before turning the cattle on pasture and even providing hay in covered racks out in the pasture does more than any other practice toward keeping down bloat, but no one practice seems to be sufficient to absolutely prevent bloat under all conditions.

4-H Club Activities
(Continued From Page 1)
made by Mrs. Paul Treadwell with color slides sent by her husband, Air Force Captain Paul Treadwell, who is stationed at Goose Bay, Labrador. Mrs. Treadwell commented on the slides and explained the great northern people and its people. John D. Whitley was elected president of the club. He and the following officers will take office July 1; Mrs. Ed White, Vice-Pres-

ident; Mrs. Howell Jordan, Secretary; Mrs. Francis Thompson, Assistant Secretary; Francis Thompson, Treasurer; Gwin Matthews, Sergeant-at-arms; Mrs. Thompson Wadsworth, Reporter; and Mrs. Roy Thompson, Parliamentarian. Folk games which will be presented at the PTA meeting Thursday night, April 19, were practiced during the recreational period. The Young Farmers' and Homemakers' Club meets at the Ripley Elementary School every second and fourth Wednesday night. All members are urged to attend and bring potential members to these meetings.

Safety Rules Are Listed
"If that boy had given the correct signal, he would be alive today!"
Yes, if the boy riding the motor scooter had given the correct signal, even now he might be getting his vehicle ready for use this Spring. But the youth was not trained properly in the rules of safety. He waved for a right turn, but turned left—into the path of an automobile. This illustration of what happens when youngsters do not know safety rules was used today in connection with the Tennessee Safety Council's April traffic safety campaign. The council this month is working with the National Safety Council in promoting child pedestrian and bicycle safety.

Nolen E. Puckett, Executive Director of the Tennessee Safety Council, directed the following appeal to parents who plan to buy or have already purchased motor scooters for some member of their family. "Every operator of a motor scooter, and bicycle as well, should be instructed thoroughly in traffic rules and signals by parents before being allowed to take the vehicle out on the streets. In Tennessee, motor scooter and motor bike operators must be 16 years old to secure regular driver's license, and at least 14 to get a limited driver's license which is good only over certain designated routes. The Council Director pointed to

figures released by the National Safety Council. "An estimated 65 youths were killed and 5,000 injured riding motor scooters in 1948," he said. "Four-fifths of the deaths and injuries resulted from collisions with other motor vehicles. And 45 percent of the motor scooters were in violation of traffic regulations at the time of the accident."

- "These statistics show two things—First, operating a motor scooter is serious business. Second, many operators either don't know or are ignoring safety regulations. "The need for parental instruction is readily apparent." "The following rules for bicycle safety were listed as applying to motor scooters:
1. Always ride on the right side of the street.
 2. Don't stunt or weave.
 3. Ride in single file.
 4. Don't carry passengers.
 5. Stop for red lights and stop signs.
 6. Don't hitch onto autos, trucks or street cars.
 7. Avoid riding after dark. But, if you must ride, make certain your lights and reflector are in good condition.
 8. Above all, know and obey all traffic laws. They apply to you as well as to all automobile drivers.

3 WEST STATE JUNIOR SHOWS FORM NATIONAL
Junior livestock producers in West Tennessee who have been feeding out animals for three events will be able to concentrate on one big show this fall, says J. S. Robinson, U-T Agricultural Extension Service livestock specialist. Three shows have been combined into the annual Dixie National Stock Show and Sale, first of

HEADQUARTERS FOR **NORGE** HOME APPLIANCES
Out of this World for value!

The picture to the left shows results obtained by using Dow Premerge at cotton planting time. This picture was taken a little over a month after planting and treating. A band from 12 to 14 inches wide was sprayed immediately over the drill from a nozzle mounted 12 inches behind the pack wheel of the planter.

Dow Premerge gave 3 to 6 weeks residual weed control. The field pictured had approximately 9 inches of rainfall between planting time and the time the picture was taken. This illustrates the big advantage of using Premerge in view of the fact that weed control is obtained when no other method could be used. By using Dow Premerge results have shown that at least one hoeing was eliminated and the time required for subsequent hoeings was substantially reduced.

We are distributors of Dow Premerge and have it available in 5-gallon drums and will welcome the opportunity of discussing chemical weed control with you.

Tennessee Outdoors

Louis S. Clapper
State Game and Fish Commission

If it weren't for quirks of human nature, the problem of restoring wildlife populations to Tennessee would be immeasurably easier

to solve. Because a few people violate the laws and get away with it, many otherwise responsible citizens want to try the same thing—possibly as a way to show an unconscious resentment against all restrictions. Hunters complain of lack of game but make no effort whatever to help the situation, much the same as children want to eat their cake and have it, too. Righteous citizens who would turn a bank robber in at the first suspicion turn their backs on the deer poacher or stream dynamiter.

It is difficult for conservationists to understand why many people, especially sportsmen, do not think logically on wildlife problems. Why doesn't a fisherman get angry at the stream dynamiter who kills ten times the number of fish he wants or can use? Why doesn't a hunter report the gunner who kills an entire covey of quail at root? Why do farmers who like birds and animals strip their properties of all vegetation except land in crops or pastures?

It's all in Nature's point of view: skunks often raid duck nests and kill ducklings but skunks also eat quantities of snapping turtle eggs and snapping turtles also kill ducklings.

Jack Hardy, of Memphis, is the first angler of the season to have a fish jump into his boat. It was a crappie that weighed just under a pound.

Warmer weather means the re-appearance of a number of hibernating creatures, including snakes.

Rail oddities

Among the snakes to be found in Tennessee are three poisonous species: the rattlesnake, the copperhead and the cottonmouth or water moccasin. While only a few people are bitten each year, the following precautions are urged:

1. Wear heavy leggings or boots when in areas containing snakes.
2. Walk with care through brush or swampy areas and along rocky ledges.
3. Step on logs and look down before proceeding—never step over a log without looking.
4. Choose the site carefully before sitting down or kneeling.
5. Avoid handling live venomous snakes and use care with dead ones.

Worth remembering... in World War II railroads handled more than 90 per cent of all the war freight and 97 per cent of all the organized military travel.

CARD OF THANKS

We wish to take this means of publicly expressing our thanks to all our friends and neighbors who extended their kindness and sympathy to us during the illness and death of our dear son, Frank Eskridge. Especially do we thank Bro. Cooper for his consoling words and the Avery Quartet for the lovely singing. Also Garner's Funeral home for their efficient service and for all the beautiful floral offerings.

May God's richest blessings fall on each of you.

Mr. and Mrs. J. M. Eskridge

SS Report Must Be Correctly Made

During the last twelve weeks, the Dyersburg Social Security office has received 150 notices from the Central Social Security records office relating to employees in this area who sent in quarterly reports on their employees without some of the employees Social Security account numbers, Joe P. Tipton, Manager, said today. During the same period 90 notices were received of employees who had reported some employees with incorrect account numbers.

"When the large number of employers in this area are taken into consideration," Mr. Tipton said, "this is a rather remarkable record, but not quite good enough to insure that everyone gets proper credit on his Social Security account for all his earnings. The amount of earnings reported without an account number or with an incorrect number, may not get credited to the employee's account, and in some cases this may be just the amount of time needed for the employee to qualify for retirement or survivors' benefits."

Mr. Tipton said that when these notices are received, it is necessary for his office to contact the employers involved in order to secure the employees account numbers, if possible. This is expensive in time and money, both for the Government and the employer. He urged employers to request new employees to present their Social Security account number cards so that the employer can

record the name and number correctly. If the employee has never had an account number, or has lost his card, he should be requested to apply for a card immediately. The Dyersburg office will be glad to furnish employers with the necessary application blanks for this purpose, or they may be obtained from any Post Office.

"I have found very few employers who willingly turn in an incomplete or incorrect report," Mr. Tipton said.

SEED TREATMENT

As a part of this year's efforts for better cotton yields, disease control takes a leading place, say specialists of the U-T Agricultural Extension Service. Seed treatment is strongly recommended as one of the important steps.

MORE PROFITABLE

Selling corn in the form of pork is more profitable than selling it on the open market now, the corn-hog ratio being as favorable as it has been for months, say livestock specialists of the U-T Agricultural Extension Service.

From where I sit... by Joe Marsh

Friendship—Four Thousand Miles Apart

Never quite got the hang of how to play chess myself, but I'll pay this for the game—it started one of the strongest friendships I know of: between Dad Wilson in our town and a fellow in Sudbury, England.

The two of them have never met or seen each other—but for eight or nine years they've been playing chess by mail together. Dad puzzles over the Englishman's latest letter, takes a couple of days to think it over, and then airmails a chart of his next move.

Dad always thinks best with a mellow glass of beer beside his chessboard. And the fellow in England writes that he does the same. "Almost as if we were in the same room," says Dad contentedly.

From where I sit, you can talk about diplomacy and foreign policy, but it's often little friendly things—like a game of chess or a glass of beer—that can make for tolerance and understanding... between people of different nations, between folks here at home!

Joe Marsh

Poisonous snake bites are seldom fatal if properly treated. The following procedure is recommended in the event of a poisonous bit:

1. Apply constricting band or tourniquet above bite.
2. Clean vicinity of bite with antiseptic.
3. Make cross-shaped cuts in flesh over puncture.
4. Make suction to cuts to draw off poison, using mouth if suction cups are not available.
5. Do not use alcoholic stimulants when bitten.
6. Seek medical aid but avoid over exertion.

Nankipoo News

Joe Cates of Memphis spent the weekend here with Mr. and Mrs. Roy Hilliard, Sr.

Mrs. Annie Sanders spent a few days last week near Edith with Mrs. Anna Pennington.

Ed Harrell's nose was broken Sunday when it was hit by a baseball.

"Smart Buy's Roadmaster"

IT started the day the 1951 ROADMASTER made its first appearance—and has been building up ever since.

Folks looked at the fresh new styling—the power—the features—the fabrics—the cloud-soft cushions—and the prices—and said, "Here's the smart buy in the fine-car field."

Why don't you come and see for yourself what a sensational buy this proud beauty really is?

It's a honey to handle—a joy to ride in—and just about the handsomest thing on wheels.

It has room, and poise, and a level-going gait that comes from coil springs front and rear.

There's a triumphant thrill in the willing obedience of its Fireball power and the luxurious ease of its Dynaflow Drive, which doesn't cost you a penny extra.

There's a sweeping view fore and aft through broad and uncluttered glass areas, and the new clarity of an instrument panel with high visibility at night.

Even the brakes are new, self-cooling, with a grip that takes hold like steel fingers in a velvet glove.

Here indeed is a car that is fine in bearing, in action, and in the precision of every structural part—a ROADMASTER custom built by Buick. When will you try one as our guest?

Equipment, accessories, trim and models are subject to change without notice.

YOUR KEY TO GREATER VALUE

Tune in HENRY J. TAYLOR, ABC Network, every Monday evening.

Football team. Why? Because they beat Gates boys Friday with a score of 7 to 0.

Congratulations Maurica Etta Lovelace for winning a white ribbon at the track meet in Ripley. We welcome Mrs. Jack Stribling from Ripley as our new teacher.

We will give you a complete report on our seventh and eighth grade "Prom" next week so watch for it.

We really had a bad day for our rally Saturday. We only went to the picture show and came home. We are hoping to have it over soon.

Eighth Grade

"Hey, Folks! Just listen to this! We had a softball game Friday with Gate: — the score was 7 to 0 in our favor."

Three of our boys brought home ribbons from the track meet in Ripley Friday. They were: Jerry England who won first prize in football kicking, second prize in the 75-yard dash and third prize in the hundred yard dash; John Hall, who won first prize in high jump and Jimmy Lewis Smith who won second prize in passing the football and third prize in broad jumping.

Although it was a bad day for 4-H Rally. Everyone seemed to enjoy it.

We welcome Mrs. Jack Stribling as our new teacher.

We were all happy to get to see General MacArthur on television Friday. We thank the people who were responsible for our getting

to see him by allowing us to use their homes.

We are all excited over the seventh and eighth grade banquet and party but we'll have to wait until next week to tell you about it, so be watching these same columns for the news.

Property Claim

(Continued From Page 1)

sources. Public funds thus recovered are used to help other people who are in need.

At the time the law was put into effect, each recipient was notified officially of the new policy. The law was explained in detail and each recipient was asked to indicate whether or not he wanted to continue receiving assistance with the understanding that the state would have a claim on his property after death.

About 2,000 recipients who owned a small amount of property informed the county welfare offices that they would rather be dropped from the assistance rolls than to allow the claim. Their cases were closed, but a number of them have since reconsidered and agreed to the claim. At present almost 25 percent of the persons receiving old age assistance own small homes.

removed. Delain Moore and Lynn Ezekill were absent Friday due to sickness.

We had twenty-three to go to the rally Saturday at Ripley. We had a good time if it did rain. We had 16 to go to Sunday School Sunday. We had a spelling match Friday that was fun. Shirley Wyrick and Larry McBride did not miss a word. We spelled all the words we had in our speller. We think they are really champion spellers!

Fifth Grade

The fifth grade report an excellent day at the 4-H Club Rally in spite of the rain. Monday morning we exchanged experiences each had at the rally.

Our arithmetic is getting more interesting as we learn to add unlike fractions. We have finished making bar and line graphs.

Many of our group attended Sunday School Sunday.

Mrs. Daws' room enjoyed making greeting cards last week. Some of them were most attractive.

Ten of our group did a music

game on the 4-H Club program Friday morning. Seventeen of us had a good time at the 4-H Club Rally Saturday at Ripley. Several of our group made weekend visits. Mary Kirby visited Gates, Rachel and Betty Jo Norby went to Dyersburg and our teacher spent Saturday in Memphis.

Sixth Grade

We enjoyed another 4-H Club meeting last Friday under the direction of Miss Cora Livingston and Mr. Edd White. We gave a mixed program at the beginning of the meeting. Many took part in the program. Although Saturday was a rainy day twenty-five of us went to the club rally in Ripley.

We extend our sympathy to "Miss" Oma over the loss of her cousin, Mr. Dorsey of Brownsville. The new teacher, Mrs. Stribling, taught in Mrs. Oma's place while she attended the funeral.

We are beginning to think about examinations that are just about here. We are reviewing in history now — wish us luck!

Seventh Grade

"Happy Birthday" Wymond Lovelace, Lou Eva Baker and Mr. McCorkle.
