Pharmacy Topics

Large study to compare the drugs used to dissolve blood clots in a heart attack found all three equally effective, "The Lancet" reports. But the oldest and cheapest-streptokinasewas also the safest, according to the report.

Regular exercise seems to help people with mildly elevated eye pressure-an early sympton of glaucoma-to lessen the pressure and reduce or delay the need for drugs, according to a study at Oregon Health Sciences University in Portland. Coming soon: a system that converts dental X-rays into conventional X-rays and can be fine-tuned for a better image, making diagnosis easier. System should be available in a couple of years.

Researchers at Jefferson Medical College in Philadelphia found that lying down on one's right side after a heavy meal is twice as likely to lead to heartburn as lying on the left side.

Their advice: avoid fatty foods and alcohol; wait three hours before lying down.

To ease the discomfort of heartburn, we offer the most effective stomach soothers at Arnold's Health-Mart Drug Co., 112 East main St., Halls, 836-7211.
